Planet > We Care

The Company realizes that number of world population is on the rise which can potentially cause exploitation of natural resources and energy, affecting human and ecosystems. Therefore, the Company encourages people to have a mindset that concerns of utilization of energy and natural resources and acknowledge that it is a material issue and everyone's responsibility to work together to achieve the most efficient utilization. Resources can be reused back in production processes which can alleviate the crisis on resource scarcity that is happening and lead to sustainable growth.

Sustainability Goals by 2025

- 30% reduction of the volume of waste disposed through landfill approach (from 2020)
- 10% reduction of electricity and water consumption (from 2020)
- 50% of packaging made from environmentally-friendly materials

Sustainability Guidelines

- To promote 4R principle through various projects (Reduce, Reuse, Recycle, Recover)
- To adjust business processes to mitigate environmental impacts
- To cultivate socially-responsible mindset for employees and stakeholders.
